

FIREPLACE #300-2D

The flat side of each block must be put towards inside the fireplace. It is mandatory to install the slides on this model if you want the plate (painted steel or enamelled cast iron) to hold in place. You must install them before assembling the chimney, after having installed the 2 Arms 5 Notches 42 1/4", the 42 1/4" from BBQ's side and the Back Left Arm 42 1/4" from the wood side but before the Center Special 36" of the chimney. It is strongly recommended to apply a joint of silicone between every row of the chimney to prevent the smoke from escaping between the rows. Visit www.feuardent.com (Assembly section) for advices and assembly's pictures of your fireplace and the available accessories. For outdoor use only.
